OBSERVATIONS

ON

THE EMIGRATION STATISTICS OF IRELAND

FOR THE YEAR 1918.

TO HIS EXCELLENCY JOHN DENTON PINKSTONE, VISCOUNT FRENCH,

Esq., Esq., Esq.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

I have the honour of submitting for your Excellency's consideration this Report on the Statistics of Emigration from Ireland for the year 1918.

GENERAL SUMMARY.

During the year 1918 the total number of emigrants, as returned by the enumerators, who embarked at Irish ports, with the intention of settling permanently elsewhere, was 983, of whom 443 were males and 540 were females.

They include 980 (442 males and 538 females), representing 0.2 per 1,000 of the estimated population, who were stated to be natives of Ireland. The number of emigrants (980) in 1918 is 1,131 less than that for the preceding year, and constitutes a record for the country.

During the period from the 1st May, 1851 (when the collection of emigration returns commenced) to 31st December, 1918, the number of natives of Ireland who emigrated was 4,319,693 (2,244,339 males and 2,075,354 females), equivalent to 82.8 per cent. of the average population of the country.

Table A, page 4, gives this information by counties and provinces; Table 1 supplies particulars as regards the ages, sexes, and conjugal conditions of the emigrants in 1918; Table 2 shows their occupations; Table 3 furnishes information, by counties and provinces, of the destinations of the emigrants; and Table 4 shows the numbers who embarked at the several ports of Ireland during each month of the year 1918.

"An Emigrant" is defined, for the purposes of this Report, as "a person who leaves Ireland with the intention of settling permanently elsewhere," and the Enumerators have instructions to furnish particulars regarding such persons departing in each passenger ship which sails from an Irish port.

I have the honour to be

Your Excellency's faithful servant,

WILLIAM J. THOMPSON,

Registrar-General

GENERAL REGISTER OFFICE,

Charlemont House, Dublin,

NOTE.—This Table has been constructed for the years 1844 to 1918—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 49, and assuming the annual migration from Ireland according to the returns received from the Emigration Commissioners in England.

NOTE.—1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year as given in the Tenth Census Report of 1851; as also the proportion to the total population according to the Census of that year. In 1851 the total population of Ireland was 2,742,041. The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1841 and 1871, as explained for the last year, 1918 to 1914. By adding the surplus registered in each year to the estimated population for the previous year, deducting the deaths and the number of emigrants, and adjusting the results for the years 1871-81, 1882-91, 1892-1901, and 1902-1911, so that the discrepancy between the number thus arrived at for 1851, 1861, 1871, 1881, 1891, and 1901, respectively, and the population as shown by the Census in each of the years.

1905-1918.—The estimated population for 1918-17 has been accepted as in 1914 with some additional adjustments with regard to the movements of the military. The population in 1917 has been accepted provisionally for 1904.
